

EMPLOYEE EXPERIENCE ORCHESTRATION

Orchestrate the entire employee experience

EXO, the intelligence layer inside Omni AI, turns every signal your enterprise generates into personalized, measurable experiences on every channel your employees use.

THE GAP

Enterprises have the **signals**. What they lack is **delivery**. The systems you already run produce a constant stream of updates that surface inside siloed tools, away from where employees work. That distance between what systems produce and what employees receive is where experience breaks down.

- **Operational, not corporate.** Most signals come from HR, ITSM and project tools, not the comms team.
- **Volume keeps growing.** Every new system adds more noise to cut through.
- **Employees span channels; systems don't.** No single tool sees the whole picture.

WHAT IT MEANS FOR YOU

REVENUE EXPANSION

Upsell without a new deal

STICKINESS

Infrastructure they won't rip out

DIFFERENTIATION

Lead with innovation, not headcount

OUTCOME OWNERSHIP

Sell productivity, not just delivery

HOW EXO WORKS Signals in, experience out

SIGNAL SOURCES

- Workday
- ServiceNow
- Jira
- Corporate comms
- Any system...

Employee Experience Orchestration

THE EXO INTELLIGENCE LAYER

- 1 Ingest signals**
via API, feeds & HRIS connectors
- 2 Context & prioritize**
what matters, per employee
- 3 Deliver to channels**
personalized, on the right channel
- 4 Learn & adapt**
engagement tunes the next send

EMPLOYEE CHANNELS

- Microsoft Teams
- Slack
- Intranet / SharePoint
- Mobile app
- Any channel...

Signals in → intelligence applied → personalized delivery out

Engagement feeds the next send ↺

WHAT YOU GET

■ Ingest signals from any system

Pull from systems like Workday, ServiceNow and Jira through REST APIs, feeds and native HRIS connectors into one orchestration layer.

■ Prioritize for every employee

EXO weighs relevance and timing for each person, so they get what matters to them instead of another all-staff blast.

■ Deliver across every channel

Publish once and reach Teams, Slack, SharePoint, the mobile app and microsites, including the deskless workforce a feed never reaches.

■ Measure the whole experience

Unified cross-channel analytics show what employees read and acted on, the measurement open rates alone never gave you.

What EXO orchestrates

INTERNAL COMMS IS ONE LANE

Internal comms

IT & service alerts

HR & lifecycle moments

Operational updates

Onboarding journeys

Policy & compliance
