

We're excited to take you through a no-pressure Cerkl Broadcast Overview. To better understand your department's needs and personalize the Overview experience, we're giving you a sneak-peek.

✓ Audience Manager

Broadcast offers three different ways to upload and manage your employee audience and segmentation. Integrating with your existing HRIS, manually uploading .csvs and our no IT necessary rule-based segmentation.

✓ Email Blasts

Ditch HTML with Broadcast's drag-and-drop email builder. Schedule or immediately send your fully-responsive, branded messages to the correct segments in minutes with full analytics.

✓ Intelligent Content

Instead of jumping from platform to platform to distribute internal content, publish once to all of your intelligent channels. Meaning, once an employee interacts with a piece of content, it is marked as read on every other channel.

✓ Content Control

Total control of every piece of content is in your grasp. Set the priority, frequency and lifespan of your pieces. Send to set or interest-based segments on every channel — including push notifications.

✓ Insights

Cross-channel, channel, content, category or audience analytics — filter and track it all on one platform. Measure what matters most to your team with our customized, sharable dashboards.

✓ Deskless Workforce Solution

Broadcast offers a white-labeled, native iOS and Android mobile app that delivers an intelligent, personalized experience. No extra integration required; your mobile app can be up and running in hours.

 Broadcast Platform

Deliverability, Insights and Control with Cerkl Broadcast

Ensure internal communication effectiveness, retain full control of your data, and operate with enterprise compliance standards. Broadcast is a no code, reliable, secure, flexible, compliant, privacy first and AI based platform for Cerkl web products.

Engaged Employees have up to 40% lower turnover

As everyone relies on email, having a best in class email solution that includes both what the company wants the talent to know, but also what the talent desires and needs to know yields higher engagement and business results.
